

Connector Name

# VCSync Meter Data Converter

## Overview

The Meter Data Converter captures and transmits ABT/Energy meter data to the RTM server, supporting DLMS protocols.

## Key Features

## Technical Specifications

### OPERATING SYSTEM

Windows (10, 11, Server 2012, Server 2016, Server 2019, and Server 2022)

### PROTOCOLS SUPPORTED

DLMS

### NETWORK INTERFACE

RJ45 Ethernet Port

# Security

Access Control

Authentication

## Compliance and Standards

- Protocol Compliance: Compliant with DLMS standards.
- Network Security: Ensures secure data transmission within the RTM network.
- The connector complies with ISO 9001 standards, ensuring adherence to international quality and security benchmarks.
- Developed and managed under an ISMS (ISO/IEC 27001) framework, ensuring robust information security practices.
- Follows CMMI 3.0 guidelines, ensuring a mature and standardized development process for high quality and reliability.

## Installation and Maintenance

### INSTALLATION GUIDE
